TASK-1 Report:

I created my digital literacy infographic using Canva. The design focuses on explaining the meaning of digital literacy and why it is important for students. It includes sections on useful digital tools, safe internet practices, and email etiquette. I used icons and simple points to make the content easy to understand. The most interesting part was designing the layout and choosing colours that make the infographic visually appealing. The challenging part was summarizing all information in a single page without making it crowded. Overall, this task helped me understand the importance of digital skills in academics and professional life.
