TASK-2 Report:

For my digital portfolio, I created profiles on GitHub, LinkedIn, and HackerRank. GitHub is used to store and showcase coding projects, LinkedIn is a professional networking platform, and HackerRank is useful for practicing coding skills.

On GitHub, I created a profile README that includes my name, branch, and learning goals. On LinkedIn, I added my education details including my B.Tech degree and university. HackerRank was used to start basic coding practice.

Over the next four years, I plan to regularly update these platforms. I will upload projects on GitHub, connect with professionals on LinkedIn, and improve my coding skills on HackerRank. These platforms will help me build a strong professional identity and increase my chances of getting internships and job opportunities.

This task helped me understand the importance of having an online presence.
