TASK-3 Report:

In this task, I explored both coding and collaboration platforms. For coding practice, I used HackerRank and completed a beginner-level problem. It helped me understand basic problem-solving and coding logic.

For collaboration, I created a Google Form titled “Digital Literacy Awareness Quiz” with five questions including multiple-choice and short answer types. I also viewed responses in Google Sheets, which helped me understand how data can be collected and analyzed easily.

This task was very useful because it introduced me to tools that are widely used in academics and industry. HackerRank will help me improve my coding skills over time, while Google Forms can be used for surveys, quizzes, and data collection in projects.

Overall, I learned how digital tools can make learning more interactive and efficient.
